About

Computer Engineering with four years of hands-on experience delivering full-stack web products—from React/TypeScript front ends to cloud-hosted microservices. Adept at turning complex requirements into performant, user-focused applications and taking them all the way to automated deployment. Native-level English; conversational Japanese learner.

Education

January 2021
Ankara, Turkey

Computer Engineering
İhsan Dogramaci Bilkent University ⬈

Work Experience

March 2024 – present

Software Engineer
KVK Tech
- Migrated legacy .NET MVC apps to React + Node.js, cutting page-load times 45 % and speeding feature delivery.
- Designed and maintained REST APIs and OracleDB integrations, lowering production issues 30 %.
- Built CI/CD with GitHub Actions, Docker, PM2, and blue-green Nginx deployments; releases now ship in under 10 minutes.
- Administered bare-metal Ubuntu servers, tuning Nginx and scaling to maintain 99.9 % uptime during traffic peaks.
- Led UI/UX overhaul to meet Apple Human Interface Guidelines, increasing customer satisfaction 20 %.
- Translated business needs from Apple and telecom partners into clear technical roadmaps and delivery plans.

September 2023 –
February 2024

Software Enginer
GE Vernova
- Built a React/TypeScript interface for an aviation document-scanning system, showing real-time scan previews and complex validation fields for classified records.

June 2022 –
January 2023

Front-end Developer
Azerion ⬈
- Built core React + TypeScript components for a browser-based tutorial-video editor (timeline trim/merge, text-overlay, bullet-point tools), faithfully translating design specs into production UI.
- Co-drove UX iterations with the design team, raising user-to-publish conversion and average session time.

| April 2021 – May 2022 | **Front-end Developer** |
| | *Accenture* ⊡ |

- Built an offline-capable micro-front-end for Cargill using React and AWS IoT SiteWise, hosted on S3.
- Delivered a React/TypeScript payment portal for EDF Energy that reduced agent workflows to a few clicks.
- Created an interactive COVID-test analytics dashboard for Roche, transforming raw kit data into actionable charts.

Skills

Java • C# • JavaScript • HTML • React.js • Redux • Typescript • Agile Methodologies • SCSS-CSS • Tailwind CSS

Courses

| August 2021 – September 2021 Istanbul, Turkey | **AWS Certified Cloud Practitioner (CLF-C01)** |
| | *https://www.pluralsight.com/cloud-guru/courses/aws-certified-cloud-practitioner-clf-c01* |
